Digital Poker Room

How It Works

Our Console only requires a 115v outlet to be used at a location. It is a standalone network with a high power Wi-Fi Hot Spot built in.

Players can use their own Windows devices.

Once connected to the Consoles Wi-Fi the player just opens a browser and the Console homepage has a download link and instructions for installing the player program in their device.

A Console never forgets a registered player, they can connect to the Console years later at an event and it will remember their device.

The Console is a private network and has a full network server inside that runs the banking, seating and dealer programs. Powered by IBM Thinkservers

Our Console has Patent Pending P2P game room technology there is no higher game security and trusted play available in the digital gaming world.

Field tested for over 2000 hours and passed as professional play by professional players the CG-2020 is the newest technology designed specifically for home use.

The best part of our built in club services is our efficient "usage based" member fee collection service. Club members dues are paid in proportion to the numbers of hands they play, it's fair, it's automatic, it's collected daily.

Our unit has a average hand rate of 43 hands per table per hour. That's three times faster than real world tables. It is twice as fast as online cash sites.

Our consoles allow a custom graphic to be installed in your Lobby and the Wi-Fi Hot Spot name to be one you choose.

In Poker Pod configuration the Wi-Fi is off and the Console connects to the Public IP network, available from Comcast.

Internal High Power Wi-Fi

Our Console covers your entire location with game access

Up To 200 players can connect VPN-II at one time

100 Yards

HD Quality on 10.1" Screens

Sit and Play w/ Hand History

Casual Gaming Format and Environment

Your players get to play "Old West" Sit and Play poker. You set all the game limits for each table, a table can be free or cash play.

A player can play a single hand then move to the Lobby and join a different table. No assigned seating and the Lobby table display lets you see the Nicknames of the players at each table with a Dbl-click it makes finding friends fast and easy.

Our events are a "Battle Royal" poker fest. It's the most fun you can have playing Texas Hold-em Poker. A player is not caught up in a Tourney cycle. Players can play a few hands and be done for the night or take a break and jump back in.

A player never misses the start of the night as with Tourney style events. A Player can arrive for the last thirty minuets and enter the game. Open seating creates total gaming freedom.

Our format provides your players:
No start time to play in the event, join, break and re-join
"Old West " style Sit and Play Texas Hold-em Poker
Open seating that allows movement between tables
"Battle Royal" unlimited re-loads of 1500 Chips (free play)
Rated : 5 Stars "FUN" by players

The Fabulous Knockout Poker Digital Environment:

The Lobby allows players to join any of the 12 tables at any time. A table Queue holds the player at the table until an open seat is available. It seats players in the order the requests came in. It re-loads all free players with under 150 chips on entry.

The graphic Hand History shows the table cards, the winners hole cards and the final combination of those cards. It keeps the last twelve hands available for review. There is never a need for a dispute with this advanced game feature.

Knockout Poker Lobby has direct access to all twelve tables and the players seated there - use Touch - Mouse - Key control

The Knockout Poker Table is a State of the Art Digital Table. It contains betting and game features not available from Online gaming sites. Your players will have a fatigue free, exciting experience

Our Hand History is an awesome learning tool for beginning poker players. To review the results of the hands helps build skills. This is a exclusive CG-2020 feature

Ready for 24hrs Operation

CG-2020 Console Hardware Features

CG-2020 Home Gaming Console

One button turn on "ultra easy startup"

The console screen is "RED" like in astro and photo, we use red light because it does not dilate the eyes when looking at it. Poker areas are usually a darker environment, the red screen is a great display in darker rooms. A large external VGA screen can also be connected.

Hosting poker club events was never easier

12 tables of high rate of play digital perfection is now available for home use. The console is standalone and once plugged in to 115v, can be operated from anywhere, we tested dozens of locations, it works great everywhere.

Start your own local cash play poker club, we make it easy to host great poker events in your home. This system was designed to allow the poker enthusiast to take his home games to the next level.
