Peer to Peer Gaming (P2P) Not Online - VPN-II private network

US Casual Gaming's P2P home operated Poker Pods are now being installed everywhere. This guide is to help you get started with our "New Technology", a safer, more secure digital gaming system.

Install the P2P player program

Every Poker Pod in the world has a unique Pod ID number and can be reached by installing the Knockout Poker P2P player program. Install it once and then add as many gaming locations as you want.

Get a link from a Pod host to get a player program.

Secure Game Ways is the only official site online to get player programs

The Knockout Poker Download page is displayed

Click the Download Now and SAVE the File.

Download and SAVE SetupKnockoutPokerP2P.zip (click Download Now)

Special Note about Virus Scanners: PLEASE READ

Every P2P poker Pod is owned by an individual, the download program is configured specifically for each Pod.

Because P2P is a private owned gaming platform we do not release the player program from download sites like Microsoft Store and Google. Because our program is "Unknown" we are flagged as suspect. You can trust US Casual Gaming.

Our P2P program uses a private network VPN-II to tunnel through the Internet. This code when scanned sets off most virus programs. If they remove or block the program from running select "Norton Restore" or "Defender Run Anyway".

Our program is 100% safe and has been in use since 2012 as seen in Bluff Magazine.

Our player program talks to your PC to store Keys and the Poker Pod Server ONLY, we do not look into your PC, several attempts to get the scanners to leave us alone have failed so far.

Extract the Setup Program

You downloaded a .ZIP file, it is a compressed copy of the set up program. To run the set up program you use the file browser to "Extract" the files. Windows then opens a file window with the install files we use to install the player program.

After download windows opens a view inside the ZIP file.

Setup program Icon is GRAY and not RED

DO NOT OPEN it will fail to install

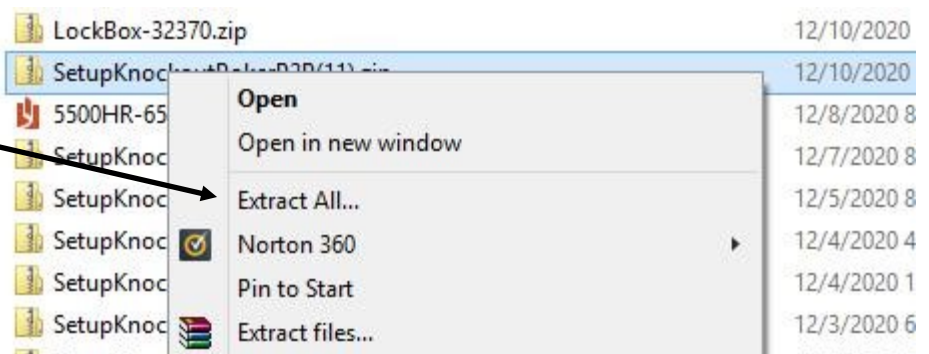

Move up one level and Select the SETUP Program using the right mouse button

From the Menu select

Extract All...

This unpacks the zip file for use.

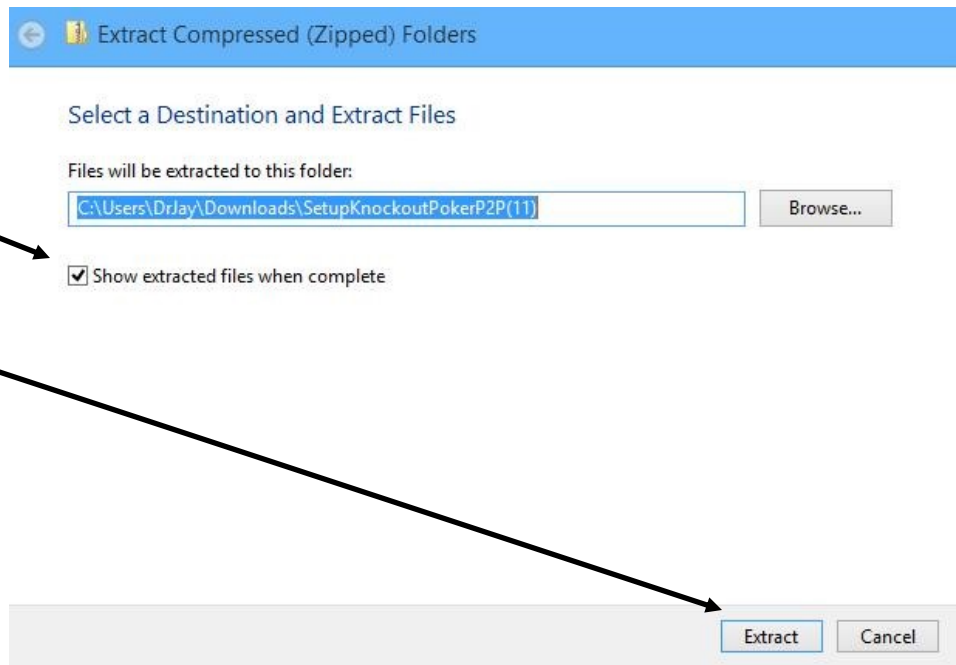

Updated 12/12/2020

Extract the Setup Program

Windows has the extractor program built in, when selected this box pops up. Select a folder to put the uncompressed setup files. It will create one in download as a default.

After extraction windows opens a view of the ready to use setup files.

Push the Extract button.

An extraction progress box opens until its finished

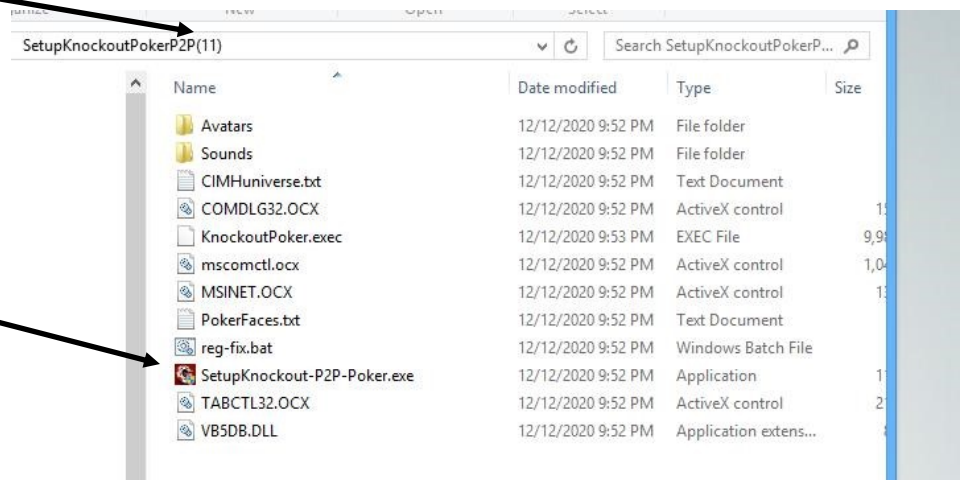

A file folder is opened with the setup program ready to run.

Setup program Icon is RED meaning its ready to use.

OPEN this file to install the player program

DbI-Click or right click the file and select Open.

Tell the security challenge "yes" to run the program.

Installing the Player Program

Once opened the file installer pops up, you select the program drive usually C:/ and press the Install Player Program button. Note: we use windows 7 system files in our tunnel code, we install the files.

Click the Install Player Program Button

Check that your program drive is listed

It only takes a min to install the files, a check list is shown.

When a full OK status is displayed the Launch the Player Program button will activate.

Press

Launch the Player Program Button
