Simultaneous Multi-Table Play More than one Pod Key is required

P2P technology uses “Thin Client” science in it’s design. This allows the average PC, Laptop, Tablet with an average Internet connection to play in Multiple Pods tables at the same time. Just Dbl-Click the program Icon or Shortcut and it opens again. From the Lobby Select A Room select a Key you are not currently using. The second copy of the program will log in to the Pod and display the Lobby.

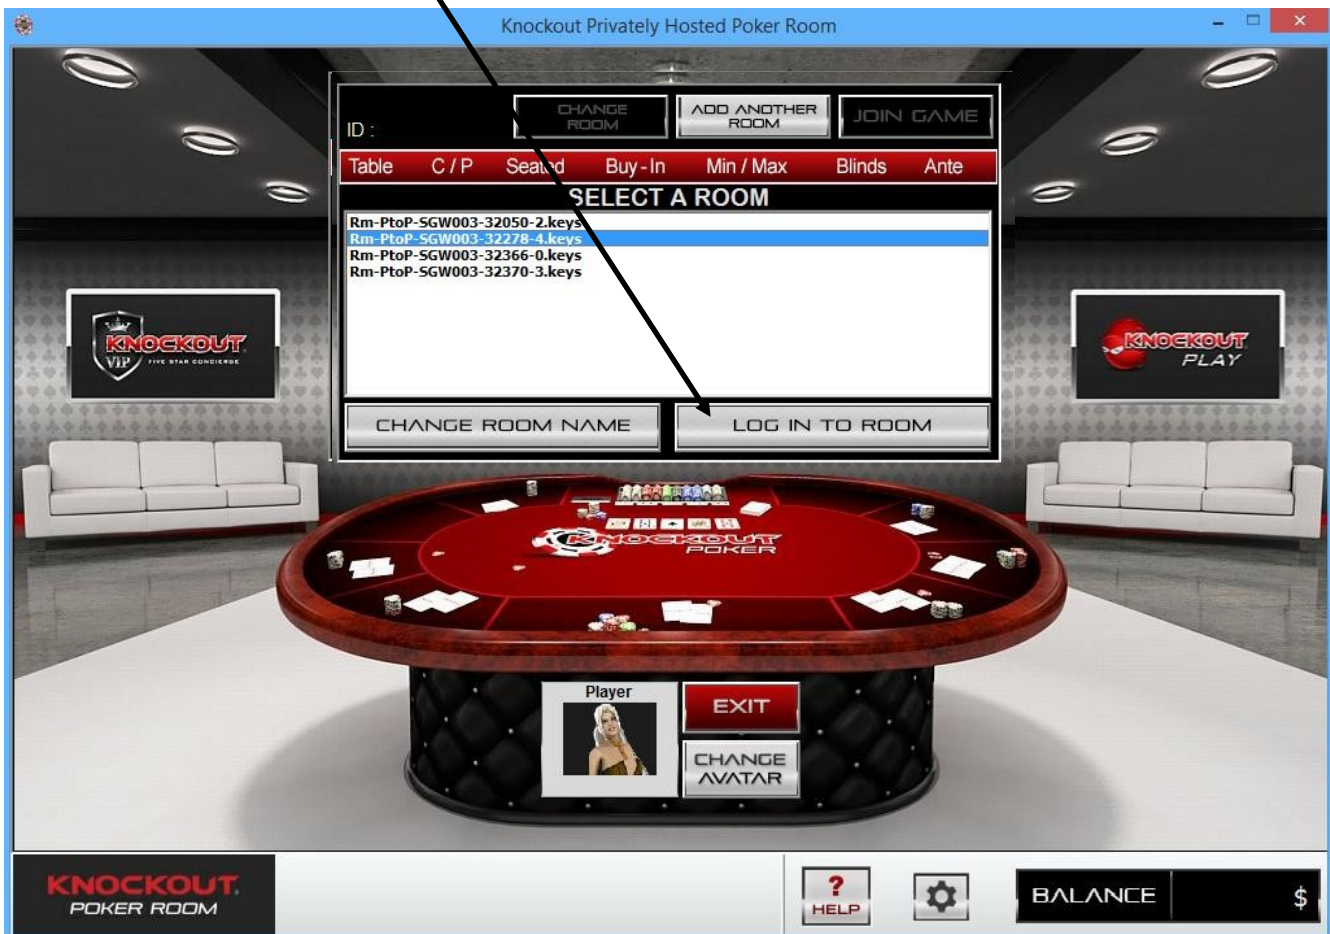

From your Desktop Shortcut to the Player Program

Dbl-Click

to open the player program

Select a Key and Press LOG IN TO ROOM

Knock Poker Universal Lobby, displays when the SELECT A ROOM panel is displayed..

Simultaneous Multi-Table Play More than one Pod Key is required

To play on more tables at the same time just Dbl-Click the desktop icon again. A second player program will open at the Universal Lobby. Select a different Key and press LOG IN TO ROOM. The Lobby will display for that Pod.

From your Desktop Shortcut to the Player Program again.

Dbl-Click

to open the second player program

Select a Key and Press **LOG IN TO ROOM**

Social Gaming requires us to buy in and cash out from the local game host. You can have multiple Keys to a single Pod and play at several tables at the same time. You can play at different Pods at the same time as in our example.

Session One

Session Two

Every Key has its own Lock Box Drawer, only the Pod host can put money into and take money out of a Lock Box drawer.

Keys issued by a Pod only work with that Pod.

Simultaneous Multi-Table Play More than one Pod Key is required

The player program that requires a bet action flashes, very easy to stay in several games at the same time. Being built for simultaneous multi-table play makes social gaming the players platform.

Only the storage and memory of your PC limits the number of simultaneous tables you can play at. In our Lab we use a four screen workstation and play sixteen tables at the same time. It is "Poker Heaven".

Actual screen shot of one of the four screens.

P2P allows you to game at several social games at the same time from the comfort of your own home.

A new technology built for the digital poker player.
